DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed July 27, 2009 have been fully considered but they are not persuasive.

Applicant argues that Sideman does not teach of wherein the multimedia editing command file is created and located at the client. The examiner respectfully disagrees. Sideman ([0080]) teaches of wherein the edit commands are produced by an interface (the interface/flash module program being downloaded from the server) at a client whereby the edit commands are then sent to an application server. Thus, in doing so, the edit commands are nonetheless being created at the client and are at least temporally located at the client before being sent to the application server. Moreover, the examiner had relied upon Fushiki (Fig.7, 702-714) in the prior Office Action for the illustration of the created command file being created and located at the client.

Thus, for the reasons stated above, the rejections are maintained.
